

Coding Challenge

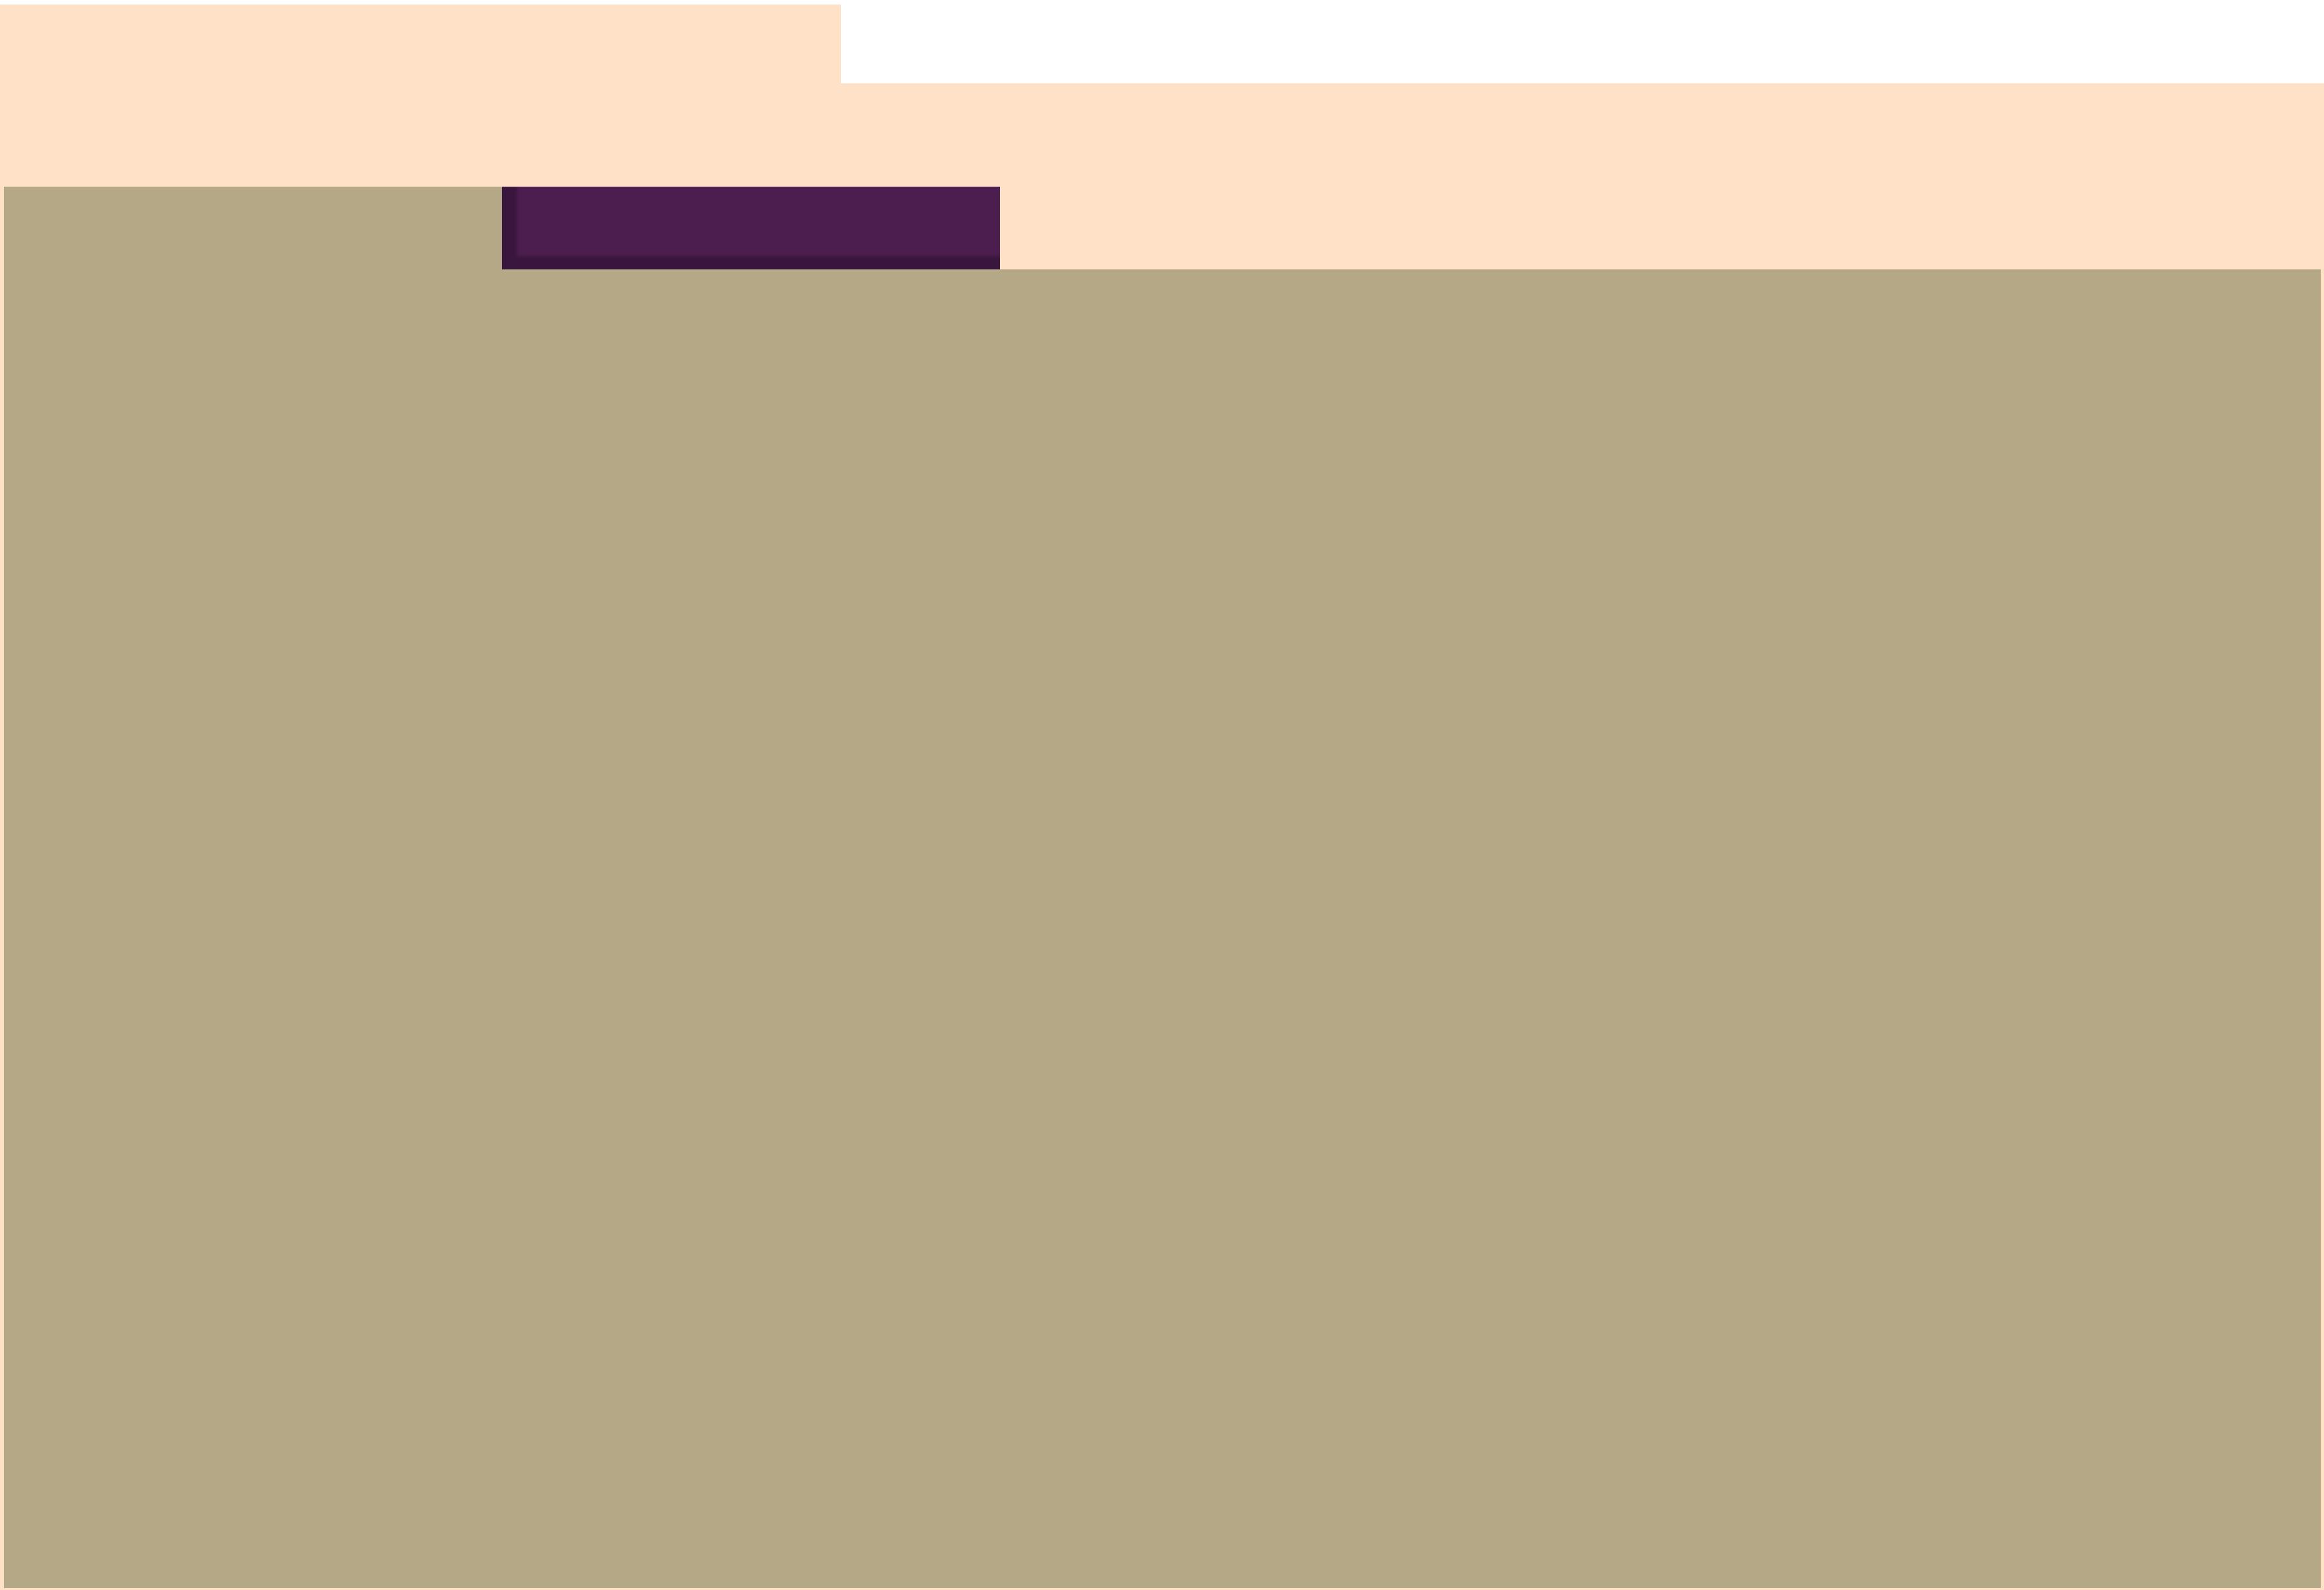

Directions: Read the code below.

Click on the names of each of the **two core functions**.

sketch.js

```
1 function setup() {  
2     createCanvas(400, 400);  
3 }  
4  
5 function draw() {  
6     background(200);  
7     fill('chartreuse');  
8     square(100, 100, 50);  
9 }  
10
```

Coding Challenge

Directions: Read the code below.

Click on the names of each of the **two core functions**.

```
sketch.js
1 function setup() {
2   createCanvas(400, 400);
3 }
4
5 function draw() {
6   background(200);
7   fill('chartreuse');
8   square(100, 100, 50);
9 }
10
```

Correct!

draw()

This function happens **on a loop** while the code is running.

Correct!

setup()

This function happens **before anything else** in the code.

Success!
